

We Show Up

We Bring It

We Do It Right

## Vintage and Drafty to Modern and Sealed

Hamline United Methodist Church had 1950's vintage single plane glass in their education wing that needed to be replaced due to decreased performance. They reached out to Brin Glass Service to help improve their windows and bring them into the current century.

### THE CHALLENGE

While the windows were outdated, they also were incredibly inefficient due to failed structural support. Hamline United Methodist Church also didn't want to drastically change the visual appearance of the windows and wanted to mimic the overall aesthetic of the church.

### OUR SOLUTION

Brin Glass Service found a modern turnkey window system and design that helped improve performance, all while keeping the original character of the building.

### RESULTS ACCOMPLISHED

Hamline United Methodist Church now have windows that are not only visual appealing but will also ensure efficiency for years to come.

### *Why was Brin Glass best suited for the work?*

Brin Glass Service has over 100+ years of expertise in window replacement and design. We understand how to install window systems that not only improve performance of your building, but do not become obtrusive to your building's design.
