

SUCCESS STORY

We Show Up

We Bring It

We Do It Right

## St. James Golf Course

St. James Golf Course is an 18-hole tournament golf course at an affordable rate with a pro shop, restaurant & bar, and banquet hall to accommodate weddings, business parties, leagues, and more.

### THE CHALLENGE

In August, the St. James Golf Course caught on fire and the clubhouse was completely burned to the ground.

### OUR SOLUTION

We meticulously crafted a brand-new storefront, integrating our expertise and superior glass products. Following fabrication, our skilled team also successfully undertook the installation process to ensure the perfect finishing touch for this new structure. The state-of-the-art glass storefront not only enhanced the appearance but also added significant value to the new clubhouse building.

### RESULTS ACCOMPLISHED

Northwestern Glass Fab provided the fabrication and installation of a brand-new storefront for the new clubhouse building.

### Why was Brin Glass best suited for the work?

We had a quick response time and lead time in our busiest season to satisfy the ultimate customer's need for quality storefront for a brand-new restaurant and clubhouse after an emergency.

We were able to meet Jason Kuester, the course owner, who was thrilled about being able to rebuild the entire building in 4 months from fire.

"Northwestern Glass Fab was best suited for this job because of the quick turnaround time on this tight time frame project and ease of working relationship with the estimating team."
