

Success Story

We Show Up

We Bring It

We Do It Right

Cannery Square North

THE CHALLENGE

The general contractor needed a subcontracting partner capable of expertly installing a complete storefront system—including insulated glass, hollow metal doors, borrowed lites, and door hardware—while coordinating smoothly within their construction schedule. Meeting tight deadlines and managing technical requirements demanded a team with deep expertise, strong communication, and a proven track record of reliable execution.

OUR SOLUTION

St. Germain's Glass brought expertise and proven processes, delivering precise installation and proactive coordination across storefront components. Our project team aligned quickly with the GC's goals, using clear communication and detailed planning to tackle complexities head-on. This enabled confident, efficient management of tight timelines and technical requirements.

RESULTS ACCOMPLISHED

By integrating skilled installers and project managers into the construction flow, we installed the storefront package—including insulated glass, hollow metal doors, borrowed lites, and hardware—with accuracy and efficiency. Our detail and collaboration delivered quality installation on schedule.

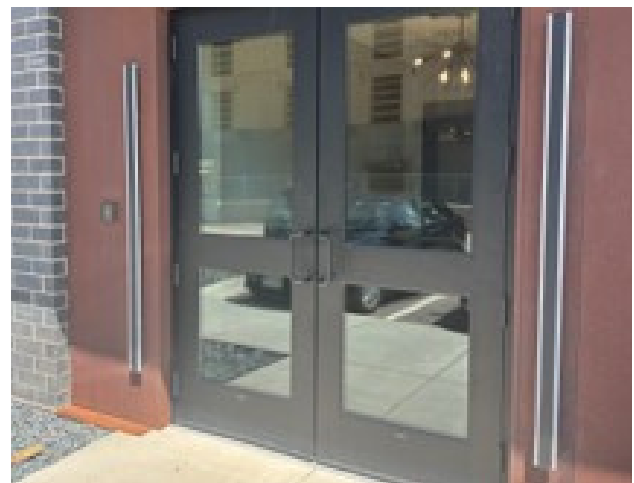

WHY WAS ST. GERMAIN'S BEST SUITED FOR THE WORK?

Our strong relationship with Hoeft Builders, starting with SCCU in 2022, established St. Germain's as a trusted partner. This led to bids and awards for Cannery North (2024) and Cannery South (2025). As a Top 50 Glazier, St. Germain's combines expertise, proven execution, and collaboration—making us the preferred choice for complex storefront and glazing projects.

Hoeft Builders Inc.

Project Start October 2022
Project End September 2023
