

The Vermilion Campus is located in beautiful Ely, Minnesota. MNC prides themselves on their strong academic programs.

The Challenge

The project required interior and exterior storefront framing, entrance systems, and glazing that needed to come together cleanly and efficiently within an active construction environment. Coordinating multiple entry points while maintaining quality, code compliance, and a polished finished appearance was essential to the success of the build.

The Solution

St. Germain's Glass provided complete interior and exterior storefront framing, entrance systems, and glazing with a focus on precise installation and seamless integration. Our experienced team managed the scope from layout through completion, ensuring consistency, durability, and attention to detail throughout the project.

Results Accomplished

The finished storefronts and entrances delivered a clean, professional look with long-term performance and reliability. The completed glazing systems enhanced both functionality and aesthetics while supporting a smooth project closeout.

Why was St. Germain's Glass best suited for this project?

St. Germain's Glass brings craftsmanship, experience, and personal service to every storefront and glazing project. Backed by the strength of the Brin family of companies, our team delivers dependable execution, quality materials, and solutions built to perform in real-world conditions.
