

Kia of St. Cloud, is a locally run dealership serving Waite Park, St. Cloud, Brainerd, Alexandria, Willmar, and drivers across Central Minnesota.

## The Challenge

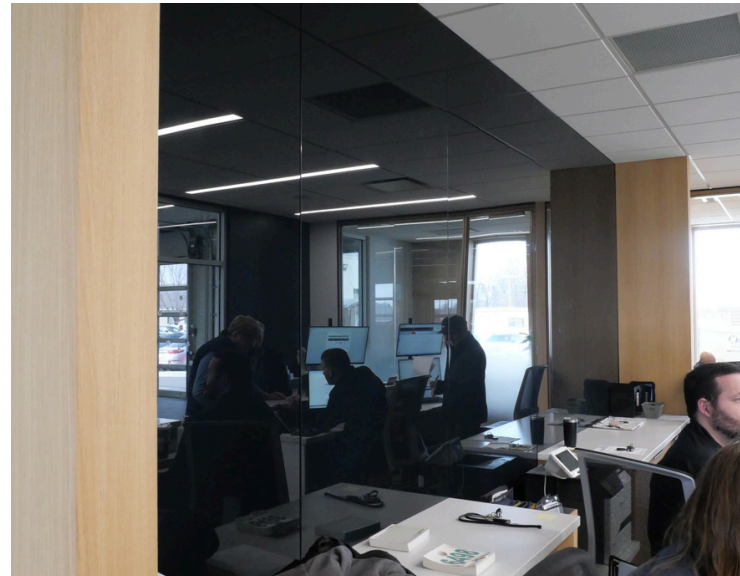

This project required careful coordination across three distinct construction phases, each with its own scope, sequencing, and technical demands. The north addition, east addition, and final remodel featured a wide variety of glazing systems—from exterior storefront windows and large door assemblies to interior storefronts and specialty systems like a sliding glass door and Skyline Glass wall—making consistency, scheduling, and quality control critical.

## The Solution

Heartland Glass acted as a full-service glazing partner, coordinating closely with the GC to ensure smooth execution across all phases. Our team installed seven exterior storefront windows, followed by the east addition that included eleven exterior storefront windows, two single exterior doors, two interior storefront windows, a sliding glass door system, and a Skyline Glass wall system. The project concluded with the remodel phase, featuring a 9-foot-wide exterior double door with sidelites and three interior storefront windows for a cohesive finish.

## Results Accomplished

The phased approach allowed construction to progress efficiently while maintaining high-quality standards throughout the project. The completed space delivers enhanced natural light, improved functionality, and a clean, modern appearance that supports long-term performance and the owner's vision.

## Why was Heartland Glass best suited for this project?

Heartland Glass was well suited for this project thanks to our local expertise, responsive service, and the expanded capabilities provided by Brin's family of glazing specialists. Our experience with storefront systems, specialty installations, and phased construction ensured dependable execution, consistent quality, and trusted results from start to finish.
